Technical Data Sheet

Purified NA/LE Mouse Anti-Rat CD11b/c

Product Information

Material Number: 554858
Alternate Name: Itgam/Integrin, alpha M, C3bi receptor, CR3; Itgad/Integrin, alpha D
Size: 0.5 mg
Concentration: 1.0 mg/ml
Clone: OX-42
Immunogen: Resident peritoneal cells from (PVG.RT1[c] x PVG.RT1[u]) and (PVG.RT1[c] x PVG.RT1[a]) F1-hybrid rat
Isotype: Mouse (BALB/c) IgG2a, κ
Reactivity: QC Testing: Rat
Storage Buffer: No azide/low endotoxin: Aqueous buffered solution containing no preservative, 0.2µm sterile filtered. Endotoxin level is ≤0.01 EU/µg (≤0.001 ng/µg) of protein as determined by the LAL assay.

Description

The OX-42 monoclonal antibody specifically binds to the CR3 complement (C3bi) receptor found on most monocytes, granulocytes, macrophages, dendritic cells, and microglia. It appears to recognize a common epitope shared by CD11b and CD11c (integrin αM and αX chains). OX-42 antibody inhibits C3bi binding activity.

Preparation and Storage

Store undiluted at 4°C.
The monoclonal antibody was purified from tissue culture supernatant or ascites by affinity chromatography.
This preparation contains no preservatives, thus it should be handled under aseptic conditions.

Application Notes

Recommended Assay Procedure:

For immunohistochemistry, we recommend the use of Purified Mouse Anti-Rat CD11b/c (Cat. No. 550299) in our special formulation for immunohistochemistry.

Product Notices

1. An isotype control should be used at the same concentration as the antibody of interest.
3. Since applications vary, each investigator should titrate the reagent to obtain optimal results.
