## Quick Reference Guide for Using BD FACSuite™ Clinical and BD FACSuite™ Software with the BD FACSLink™ LIS Interface Solution

This guide contains instructions for sending results to a Laboratory Information System (LIS) using the BD FACSLink™ interface embedded in BD FACSuite™ and BD FACSuite™ Clinical software.

# **Workflow Overview**

### **Connecting to BD FACSLink**

Open the software and log in as an administrator.

Select Tools > Preferences, then select the Worklist tab.

3 Enter the following information:

BD FACSLink Conn	ection		
Username:	IM_ADMIN		
Password:			
TCP/IP Address:	http:\\10.10.115.67	Port: 10006	Test Connection

Click Test Connection after the information has been entered.

- A dialog opens indicating that the connection was successful.

G Click

OK and close the **Preferences** dialog.

Test Cor	nnection	×
$\checkmark$	Connection successful.	
	OK	

6

You will see that the software is connected to BD FACSLink on the status bar and under System Status.

Cytometer	Universal Loader	Workstation	BD FACSLink

#### **Generating a Worklist**

- 2 Scan barcodes or manually type in the Sample ID column and press Enter.
  - The software will automatically query BD FACSLink for any test orders associated with the Sample ID.
  - Associated patient information from the LIS is added to the worklist entries.
- 3 Continue until the worklist is complete.

/orklist l	Entries Approva	al 🔹 Audit Tra	il   *   E	Signature	* Mor	e 🔹
	Sample ID	Task		Status		Location
▶1	8123	Θ	-	Ready	+L	A1-A2
▶ 2	B123	Θ		Ready	+L	A3
▶ 3	C123	0		Ready	+L	A4

If multiple tests are ordered, a dialog will open to let you select the test to add. Use the Add All or Add Selected buttons, or double-click one test.

BD FACSuite Clinical Software is CE marked. For In Vitro Diagnostic Use. BD FACSuite Software is for Research Use Only. Not for use in diagnostic or therapeutic procedures.

#### **Sending Results to the LIS**

• After acquisition, analyze the entry and mark the entry **Approved** in either the **Entry Details** panel or the **Worklist Entries** panel. The results are automatically sent to the LIS upon approval of an entry.

## Adding an LDT Assay in BD FACSuite Software

To use BD FACSLink in BD FACSuite software, you must create an assay with the following characteristics:

- Contains a Statistics View with the Include In Auto Export property turned on.
- Contains LIS Assay Names and Results Names.
- Is a shared assay.
- Select the Library icon to go to your library.

2 Expand Assays, select User-Defined, then select your assay.

Library	User-Defined Assays	
✓ Assays OBD	Name	Modified Date
User-Defined	L&L UD	11/1/2016
<ul> <li>Beads and Reagents</li> <li>Keywords</li> </ul>		
Labels Tube Settings		

3 Select the Send to LIS tab and click Edit.

Inter a BD FACSLink Assay Name.

- Only letters, numbers, and underscores are allowed.

6 Enter the required names in the BD FACSLink Result Name column.

~	Statistics	BD FACSLink Result Name			~	Statistics	BD FACSLink Result Name
$\checkmark$	All Events, Events (Tube_001)	0			1	All Events, Events (Tube_001)	AE
$\checkmark$	All Events, % Parent (Tube_001)	Required - Only let	ters, numbers and underscores are allowed.	- <b>-</b>	~	All Events, % Parent (Tube_001)	AEPP
$\checkmark$	All Events, % Grandparent (Tube_001)	9			~	All Events, % Grandparent (Tube_001)	AEPGP
$\checkmark$	All Events, % Total (Tube_001)	0			~	All Events, % Total (Tube_001)	AEPT
$\checkmark$	All Events, Statistics, FSC-A, Mean (Tube_001)	9			~	All Events, Statistics, FSC-A, Mean (Tube_001)	AEFSCM
$\checkmark$	All Events, Statistics, SSC-A, Mean (Tube_001)	0			~	All Events, Statistics, SSC-A, Mean (Tube_001)	AESSCM

A confirmation dialog will be displayed.
