

Punchout with BD Biosciences

eProcurement solutions to streamline your purchasing workflow

What is Punchout?

Punchout is an eProcurement solution that drives operational efficiencies and decreased costs through streamlined purchase consolidation.

With Punchout, you significantly reduce the amount of time it takes to make orders and drive down your overall cost per order.

The punchout solution offered by BD Biosciences lets authorized purchasers browse products and information from a BD Biosciences website automatically customized for your institution; no additional login required.

We offer a full range of services for eProcurement connectivity.

These include direct linkages between eProcurement systems, eCatalog browsing and sophisticated automated purchasing. You also get access to a fully customized web shopping experience that retains your existing institutional order approval processes.

Punchout means fewer clicks, fewer calls and more time on your hands.

Punchout Features

eProcurement Punchout

Punchout automates ordering directly from your internal eProcurement system while delivering a user-friendly shopping experience. This method lets authorized purchasers access the BD Biosciences website securely, get pricing and availability for the products they need, and transfer the relevant ordering information directly into your procurement system. For authorized purchasers, this method offers scientific product information, product availability and visibility to institutional pricing. The online catalog is always current and, once enabled, the system does not require ongoing procurement involvement for updates.

An online marketplace brought to you

Get the BD Biosciences eCatalog integrated with your eProcurement system. This method offers a user-friendly shopping experience, an efficient approval process and greater purchasing control.

Electronic purchase orders

eOrders directly link your eProcurement system with the BD ordering system through a secured connection— simplifying the buying process and reducing errors associated with manual processing.

How This Benefits You

- Seamless connection to the BD Biosciences catalog from your eProcurement system to browse products of interest
- Place products directly in your shopping cart for a seamless buying experience
- Order directly from your system, backed by a secure connection
- Easily find item availability, scientific product information, institutional pricing and past invoices—all without having to click out of your purchasing platform
