

BD FACSDiscover[™] S8 Cell Sorter with BD CellView[™] Image Technology and BD SpectralFX[™] Technology

Get deeper insights with real-time imaging, spectral flow cytometry

Achieve breakthrough discoveries with image-enabled cell sorting and advanced spectral flow cytometry

The BD FACSDiscover[™] S8 Cell Sorter expands the power of cell analysis and sorting to new dimensions by combining spectral flow cytometry with real-time spatial and morphological insights—empowering scientists to address previously impossible-to-answer questions.

Expands panel size and flexibility with 78 fluorescent detectors across five lasers with algorithmically optimized filter bandwidths Obtain insights on cell populations and characteristics that can be **visually confirmed in real time** during analysis and sorting

Enhance spectral flow cytometry with **spatial and morphological insights** to interrogate and sort cell types that previously could not be identified or isolated

Index flow and cell imaging data with the sort location to support downstream applications

Attain **high-dimensional analysis** with up to five lasers and 78 fluorescent detectors, six image detectors on the blue laser, FSC and SSC detectors

Flexible sorting: 6-way 5-mL sort, index sorting and additional format options including 96-well and 384-well plates and slides

Patented BD sorting technology features a **fixed-alignment gel-coupled cuvette** eliminating the need for operator to perform daily alignment and facilitating quick nozzle changes

Simplify your workflow with **built-in** visual inspection capabilities, more flexible panel design, automated features and index sorting, which correlates immunophenotyping, imaging and downstream assay results

Combine **image features with flow parameters** for subset classification for statistical analysis and sorting

Real-time image-enabled sorting

See what you sort. Sort what you see.

The BD FACSDiscover[™] S8 Cell Sorter leverages BD CellView[™] Image Technology, a novel high-speed imaging technology that facilitates analysis and sorting through real-time integration of image and flow data.

Phagocytosis

Plant biology

Polarization Quality control

Tumor cell killing Co-localization

CELL MORPHOLOGY

Explore cell morphology with internal and external spatial characteristics

SAMPLE QC

Visualize and confirm images in real time to obtain sample data for flow cytometry and downstream assays

IMAGE FEATURES

Image features combined with traditional flow parameters open the door to new dimensions in single-cell analysis

ADDITIONAL IMAGE FEATURES

Center of mass (X) Center of mass (Y) Forward scatter (FSC) Light loss (blue) Long moment Short moment Size Side scatter (SSC) Total intensity Image feature analysis can provide insight into DNA distribution and morphology to differentiate the phases of the cell cycle.

Flow cytometry parameters used

- DAPI-Area
- H2B (NeonGreen)-Area
- Alexa Fluor[®] 647 (PS10H3)-Area

Image features used

- Radial Moment-H2B (NeonGreen)
- Max Intensity-H2B (NeonGreen)
- Eccentricity-H2B (NeonGreen)
- Eccentricity-FSC
- Eccentricity-SSC

Image-enabled cell sorting

Max intensity and diffusivity image features were used to sort HeLa cells (GFP+ Golgi apparatus) treated with BD FastImmune[®] Brefeldin A Solution (BFA) which exhibited a dispersed morphology.

Enhanced sorting performance and capabilities

QC and analyze cells

Combine flow cytometry data with spatial and morphological insights to visually confirm cells of interest, and draw more accurate gates and to identify doublets and unwanted events.

Know what you sorted

Wells or a group of wells can be selected to display corresponding images along the image wall and to locate cells on the sort population plots panel.

Explore your data with spectral flexibility using BD SpectralFX[™] Technology

BD SpectralFX[®] Technology combines full spectrum optics, next gen QC and system-aware spectral unmixing that manages spread by adapting to instrument performance and sample conditions in real-time.

Six-way sorting of deep immunophenotyping panel

This 38-color spectral panel characterizes and sorts deep lineages of T cell and NK cell subsets.

The panel includes BD Horizon RealYellow[®] and BD Horizon RealBlue[®] Dye technology, engineered to work in tandem with the BD FACSDiscover[®] S8 Cell Sorter for high-parameter spectral analysis to reveal biological information.

BD Technical Services is your partner for performance

BD Service teams enable you to better serve your customers, patients and research partners. You can count on our deep knowledge and experience to help ensure your BD FACSDiscover[®] S8 Cell Sorter delivers expected, timely results.

Accelerate uptime and maximize the value of your investment with robust service coverage. Service contracts optimize performance by providing regular preventive maintenance as well as remote and on-site support.

Maximum uptime

At BD, we understand the cost and consequences of unexpected downtime. We are committed to maximizing your system uptime to make sure you keep your promises. Customers under service plans get priority service compared to time and materials. In addition, remote diagnostics help maximize system uptime by properly diagnosing instruments, reducing issue resolution time and optimizing field service visits.

Peace of mind

No more wondering how and when your instrument will be repaired. Rest assured knowing you have access to BD service professionals whenever you need them and when it matters most. Having a dedicated project manager helps deliver an effective implementation, accelerate value realization and provide exceptional customer experience.

Predictable expense

Protect your budget from unexpected costs. Our service plans are one flat fee that covers your corrective and maintenance-related service needs when and how your laboratory needs it.

- Responsive onsite repair
- Remote service capability
- Preventive maintenance
- Unlimited repairs
- Email and chat support
- Local field service expertise
- No hidden charges
- Extends your service warranty
- Multi-year pricing available

SUPPORT DA

- Local sales
- Applications
- Service
- FlowJo[®] Software applications
- Remote Support Services (RSS) with Assurity Linc[®] Software

DATA ANALYSIS

- Integrated with FlowJo[®] Software for data
- analysis needs

REAGENTS

 Compatible with BD Horizon RealYellow[®] and BD Horizon RealBlue[®] Dye technology

eCOMMERCE

- Offers a rich online buying experience
- Sample temperature control
- Class II Type A2 biological safety cabinet (BSC)
- BD[®] Aerosol Management Option (AMO)
- Instrument table

Class 1 Laser Product.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
